ORGANIC FARMING TRAINING

June 2017

National Service Scheme of SSN College of Engineering put hand with Sivasenapathy Cattle Research Foundation and organized an organic farming training at Sivasenapathy Cattle Research Foundation, Kangeyam. It happened for two days i.e. 6th June 2017 and 7th June 2017. About 15 volunteers from our college attended this camp. On the first day Mr.Karthikeyan made a brief talk on organic farming and how to grow cattle. Followed by that Mr.Manojkumar, SKCRF coordinator explained about the details of the manures and the pesticides to be used while doing organic farming. Merits of natural farming and importance of cattle's in farming are discussed by him. Latter we visited the variety of native breed cattles grown in their foundation like, Kangaym cattles, Malai cattle, goats and other varieties. We had our lunch and breakfast there. Volunteers stayed in their foundation house on the first day.

Day 2 started with a general discussion on reservation based system in our country and continued by demo class in which they showed us how to prepare those manures manually and organic pesticides like panchakavya, brahmaasthramm etc. Later we visited the agriculture farming land of the foundation. They explained about the trip irrigation. We visited variety of native trees and some rare varieties of plants and trees that had been planted in their land. Finally the day came to an end with a piece of advice from Mr.Karthikeyan and Mr.Sivasenapathy. Our volunteers are advised to spread awareness about the natural farming.
